

**Federal Metadata Coordinator Webinar:  
ISO Geospatial Metadata Implementation  
AGENDA**

April 16-17, 2013

12PM-4PM Eastern Time (both days)

*Note: These are different sessions each day*

**Introduction**

This webinar addresses several recommendations that came out of the FGDC sponsored Metadata Summit in October 2011 to help increase awareness about ISO geospatial metadata standards and develop strategies to move agencies forward with implementation.

Through presentations and discussion during these two half day webinar sessions, the participants will:

- develop a common language and understanding of ISO geospatial metadata standards and implementation issues
- focus on actions (roadmaps) required to transition an Agency to ISO metadata
- identify available ISO metadata resources
- establish a community of practice with regular communication and interaction
