GIS INVENTORY: GEOSPATIAL DATA INVENTORY AND MAP SEARCH

■ *The GIS Inventory (GISI)*

- *important complement to the National Spatial Data Infrastructure (NSDI) that provides a robust “living” inventory of geospatial data, directory of geospatial professionals, and fosters production of metadata by those organizations that haven’t adopted the FGDC Metadata Standard in actual practice.*
- *allows users to quickly search for GIS data and practitioners to meet their business requirements.*
- *helps government agencies to effectively coordinate and build Spatial Data Infrastructures.*
