

USDA Farm Production and Conservation (FPAC) Geospatial Enterprise Operations (GEO)

Critical Infrastructure for Agriculture and Beyond

USDA FPAC GEO

Mission

Provide best-in-class innovative customer-focused geospatial information and solutions that are accessible, current, and authoritative .

Vision

Serve the producer with advanced, usable geospatial products using modern IT.

Target Market

Climate-Smart Agriculture and Forestry Market & Beyond

Company Name USDA FPAC GEO

Established Date 2021

Type of Industry Agriculture

Business Model Fee for Service

No. Of Employees 90

Our Services

- NAIP
- LiDAR
- Derivative Product Generation
- Training

Milestones

Important Info About Organization

FPAC GEO represents the enterprise class capability around as a shared service provider to USDA and the producer community

Operating Authority

- Title VII 7 CFR Parts 2.41 & 1470
- NEPA
- 7 USC 2276
- OMB Circular A-16
- GDA
- USDA DR 3465-001

FPAC DAAC???

NAIP National Agriculture Imagery Program

The Problem

Shifting NAIP to **digital delivery** severely impacted the program's revenue stream, putting the program at risk. Rivaling other data centers, data volume growth has significantly increased costs, but budget has been fixed or reduced.

Funding

Two customers are the primary funders of the program, leading to program risk.

Staffing

Retirements & inability to hire inhouse have impacted the ability to handle new demands.

Misunderstood Demand

Inability to track data copies limits understanding of the broader value of the program to many known and unknown customers.

Why Keep NAIP Free & Open?

Rising Costs without NAIP?

Shift to Satellite Data Capture?

Annual Costs for 1/2 CONUS Coverage
(9.14M sq KM in CONUS)

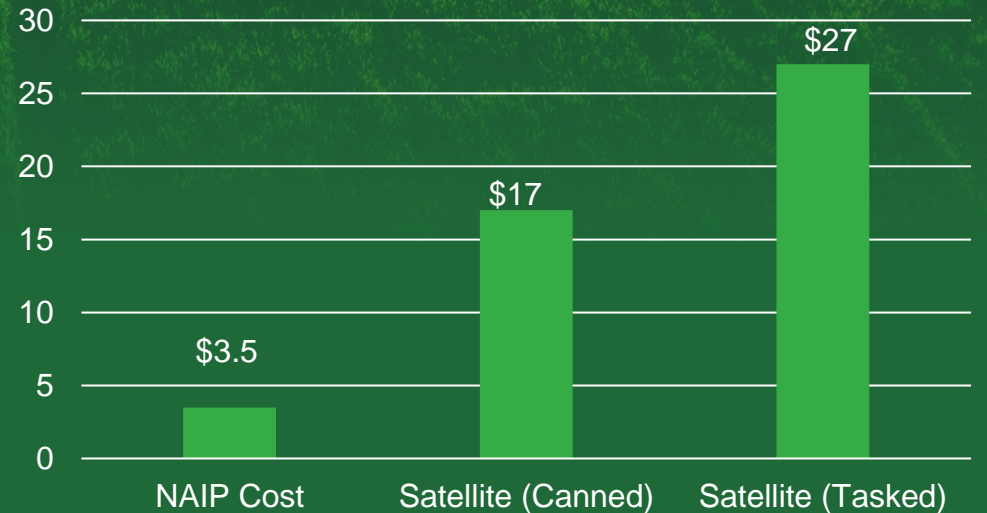

1,413 Missing DOQQs

Aerial imagery cost (2024) : \$163k

Satellite (Canned) Cost: \$961k

Satellite (Tasked) Cost: \$1.5M

Cost Per KM²

Costs get passed onto the Customer!

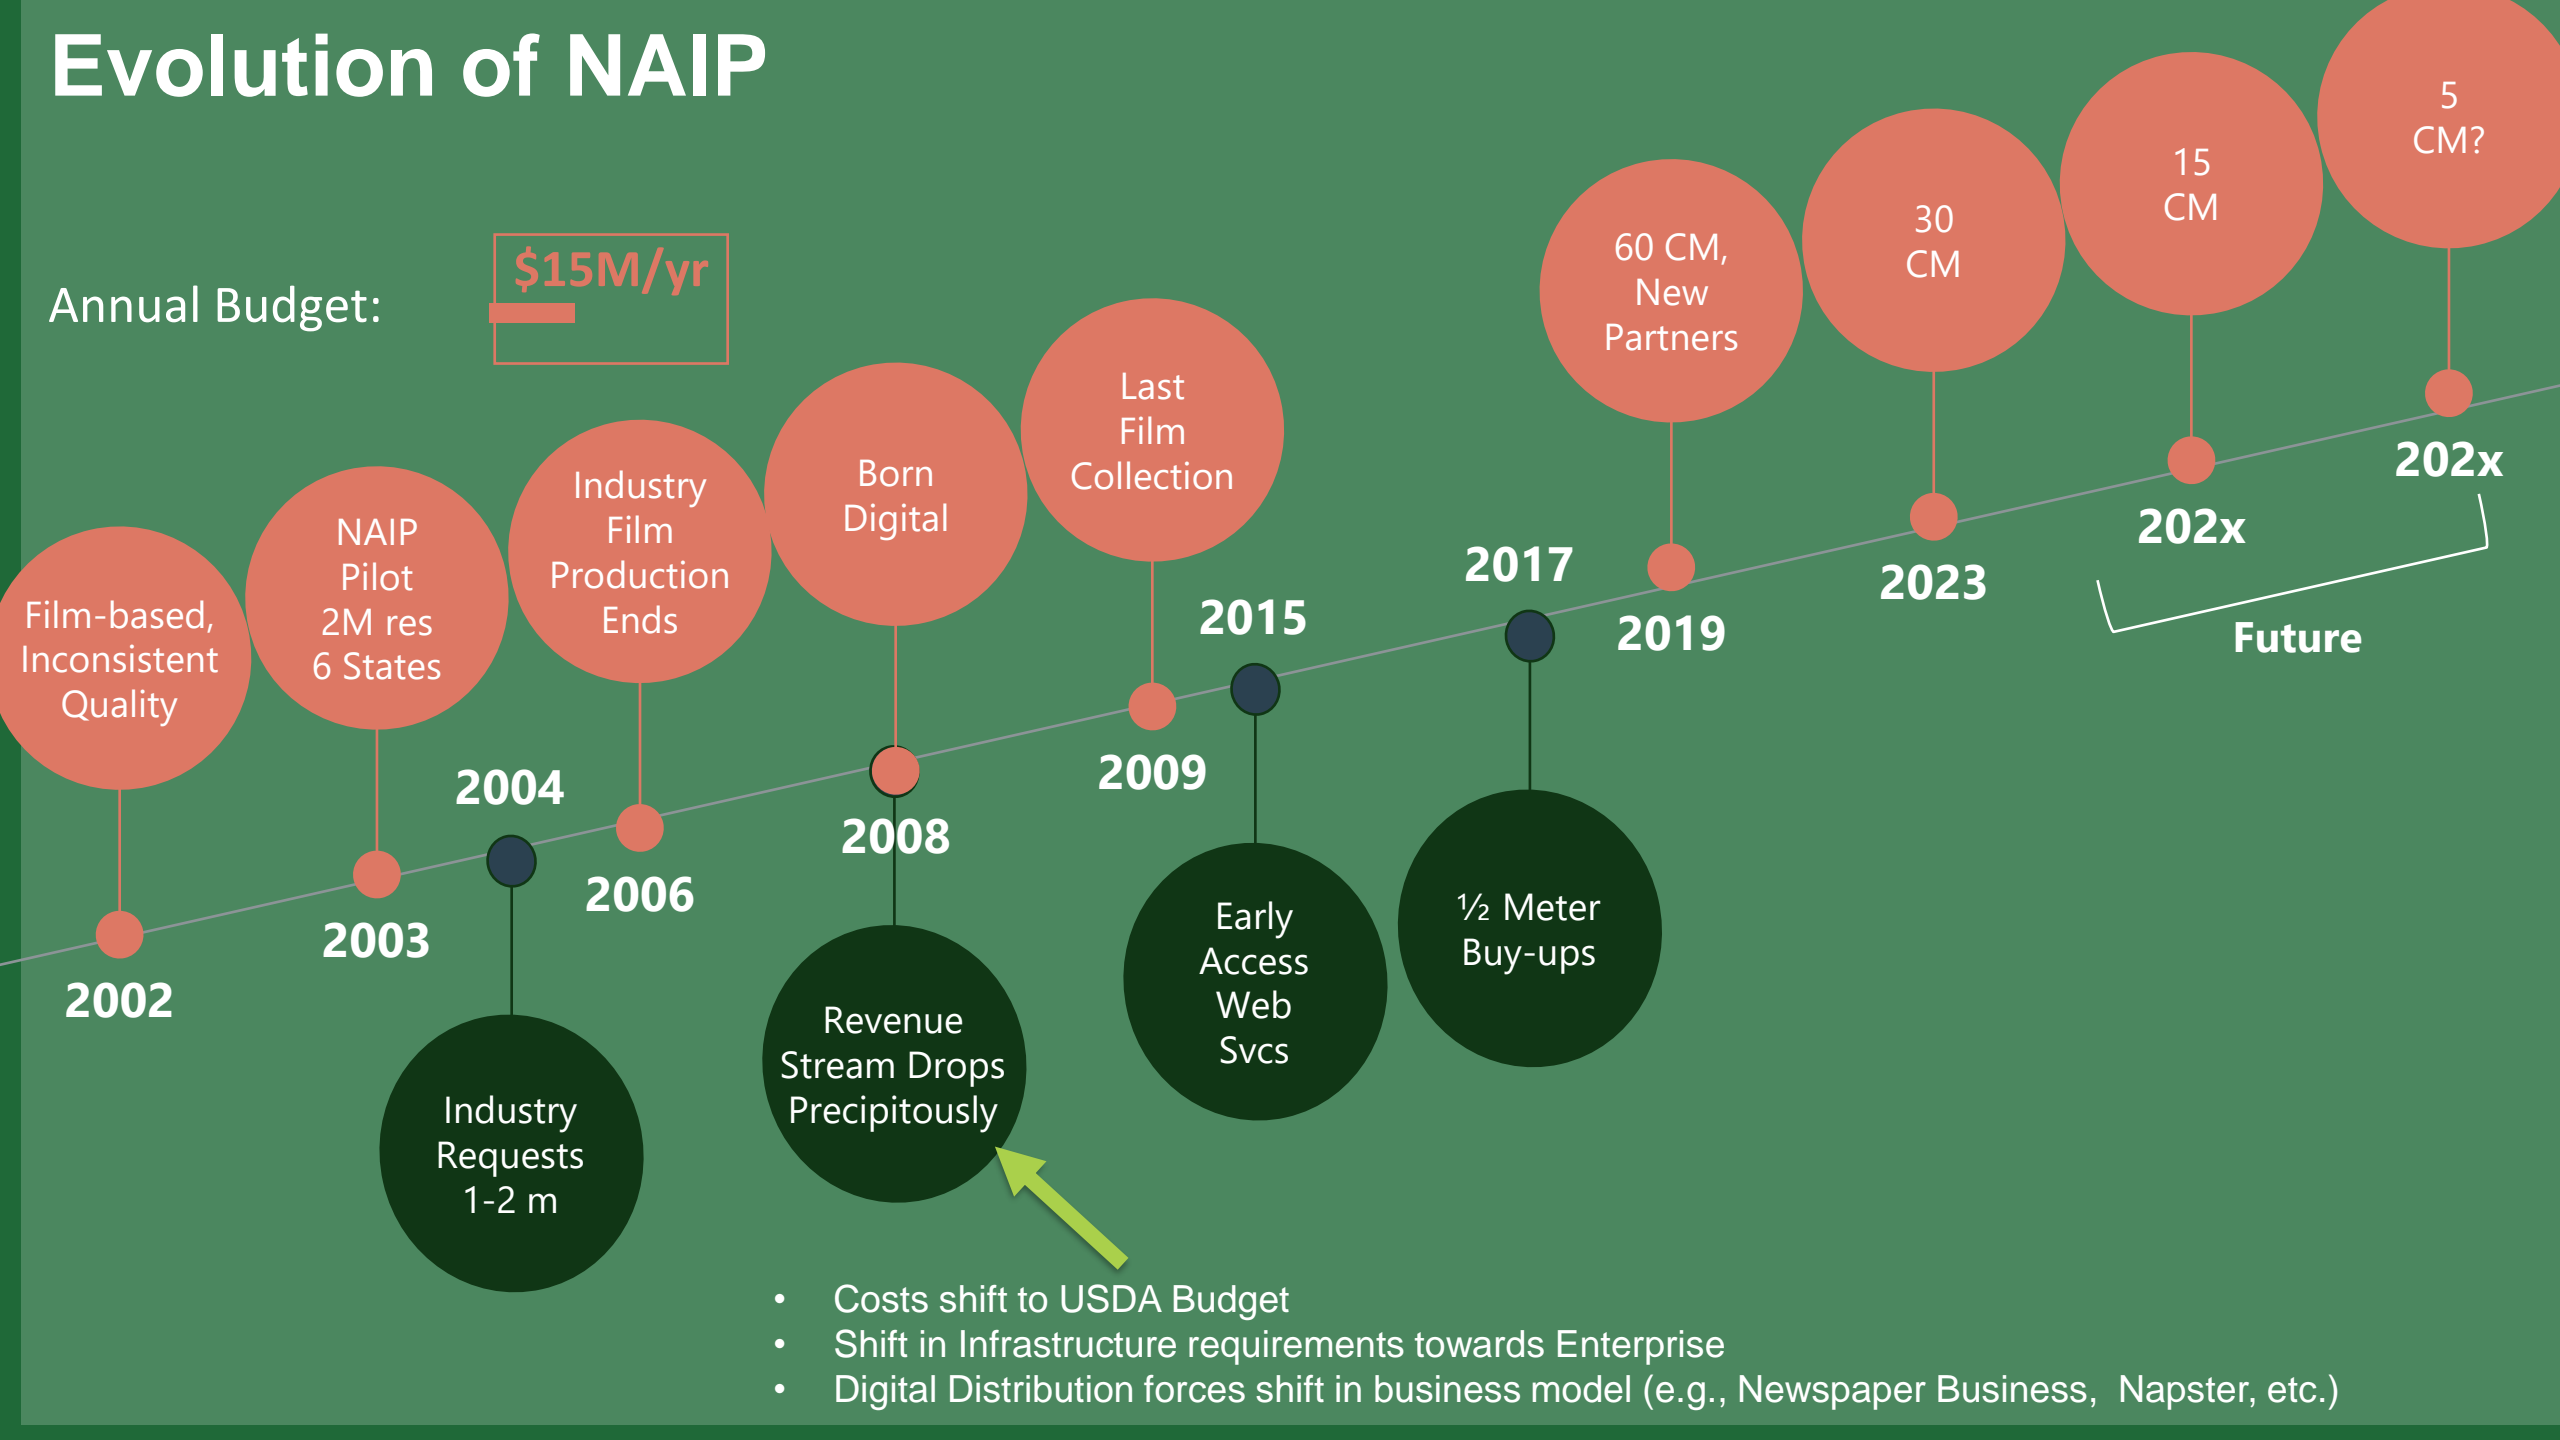

NAIP is Everywhere

Evolution of NAIP

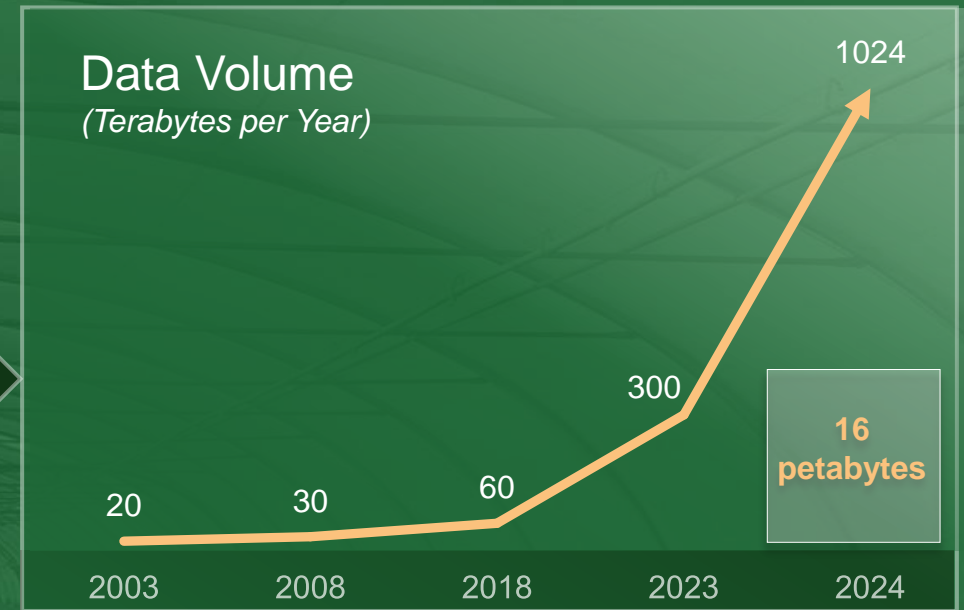

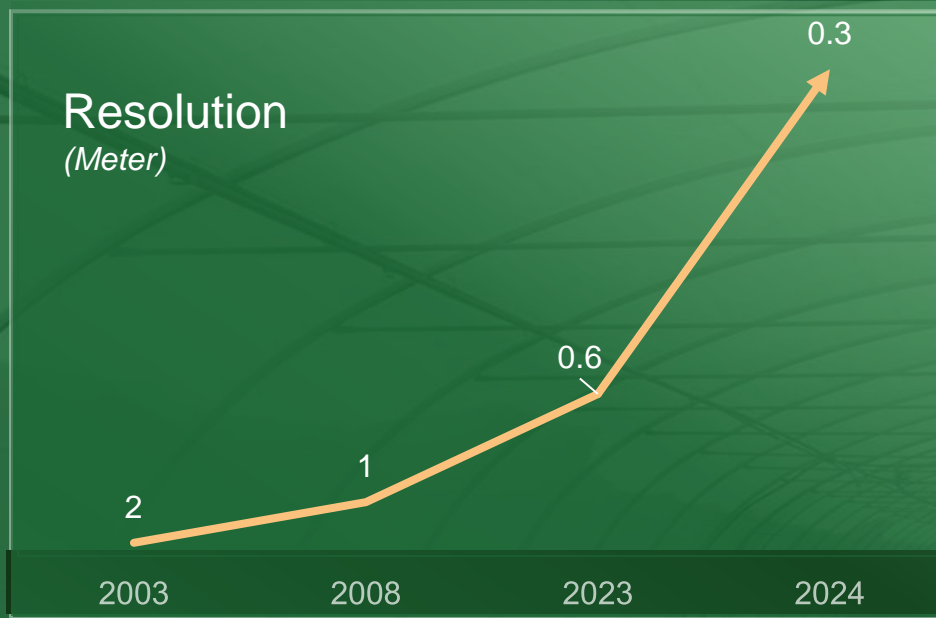

Annual Budget:

\$15M/yr

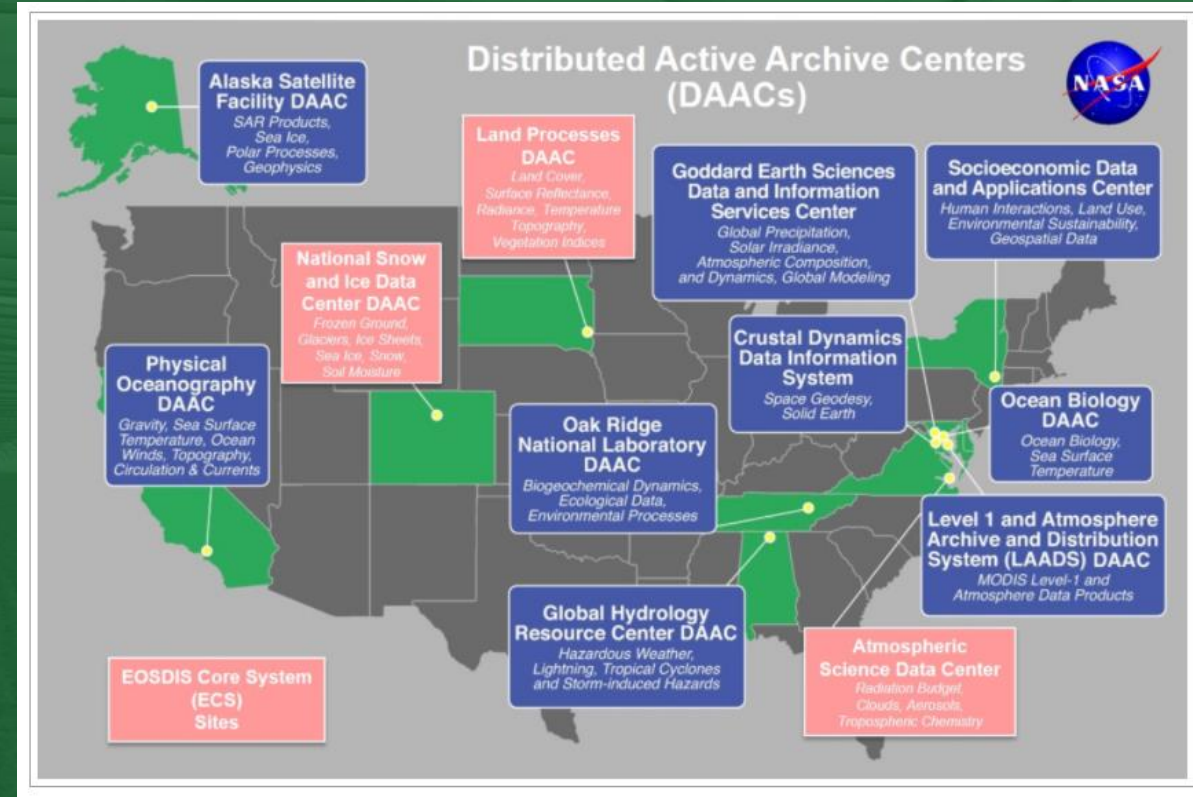

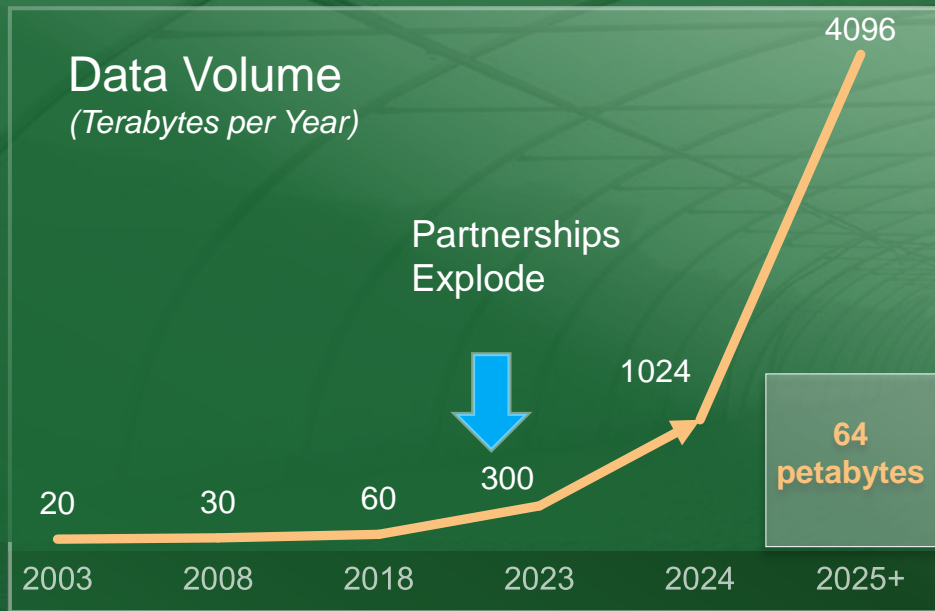

- Costs shift to USDA Budget
- Shift in Infrastructure requirements towards Enterprise
- Digital Distribution forces shift in business model (e.g., Newspaper Business, Napster, etc.)

Program Evolution

- 1 60cm Tile – 500M
- 1 30cm Tile – 2GB
- 1 15cm Tile – 8GB

Future of NAIP?

NAIP 2024: 16 petabytes (total)
 Expected volume increase: 1 PB/Yr.
 FY 23 Funding: \$15.8M/Yr.
 Cost/PB: \$1.25M

\$80M/Yr. Funding???

EOSDIS 2023: 96 petabytes (Total)
 Expected volume increase: 42PB/Yr.
 FY 23 Funding: \$291.1M
 Cost/PB: \$3M

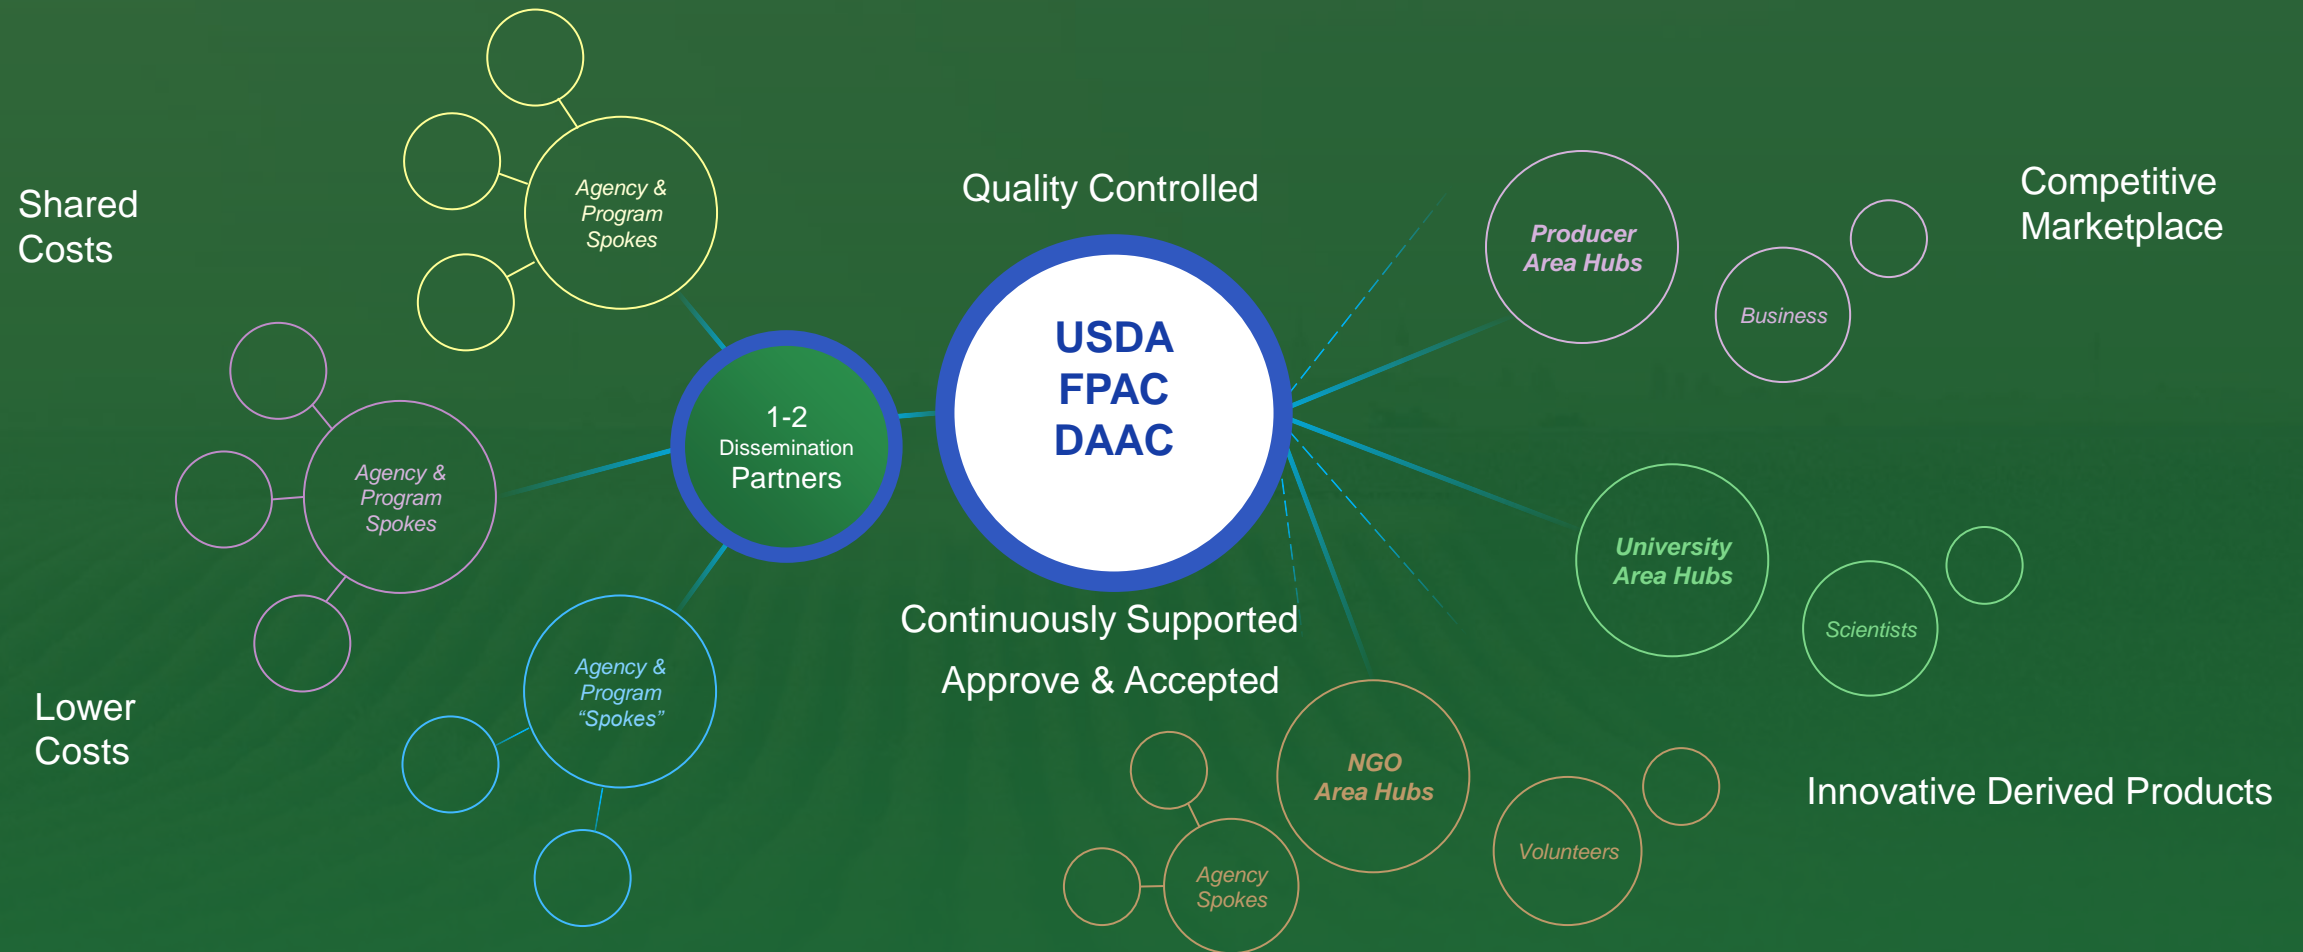

Our Solution

- ✓ **New Revenue Model for funding problem**
Acknowledgement of broader applicability than Ag leading to new revenue model, elevating NAIP to the level of the NASA DAACs and other Federal Data Center
- ✓ **Focus on Automation for staffing problem**
Utilize advanced technologies (cloud capabilities, AI/ML, etc.) to increase productivity of existing staff and keep costs down.
- ✓ **Know Your Customer for misunderstood demand problem**
For the NAIP industry, leverage customer relationship systems to capture usage, value metrics, etc. to better know the customer's needs

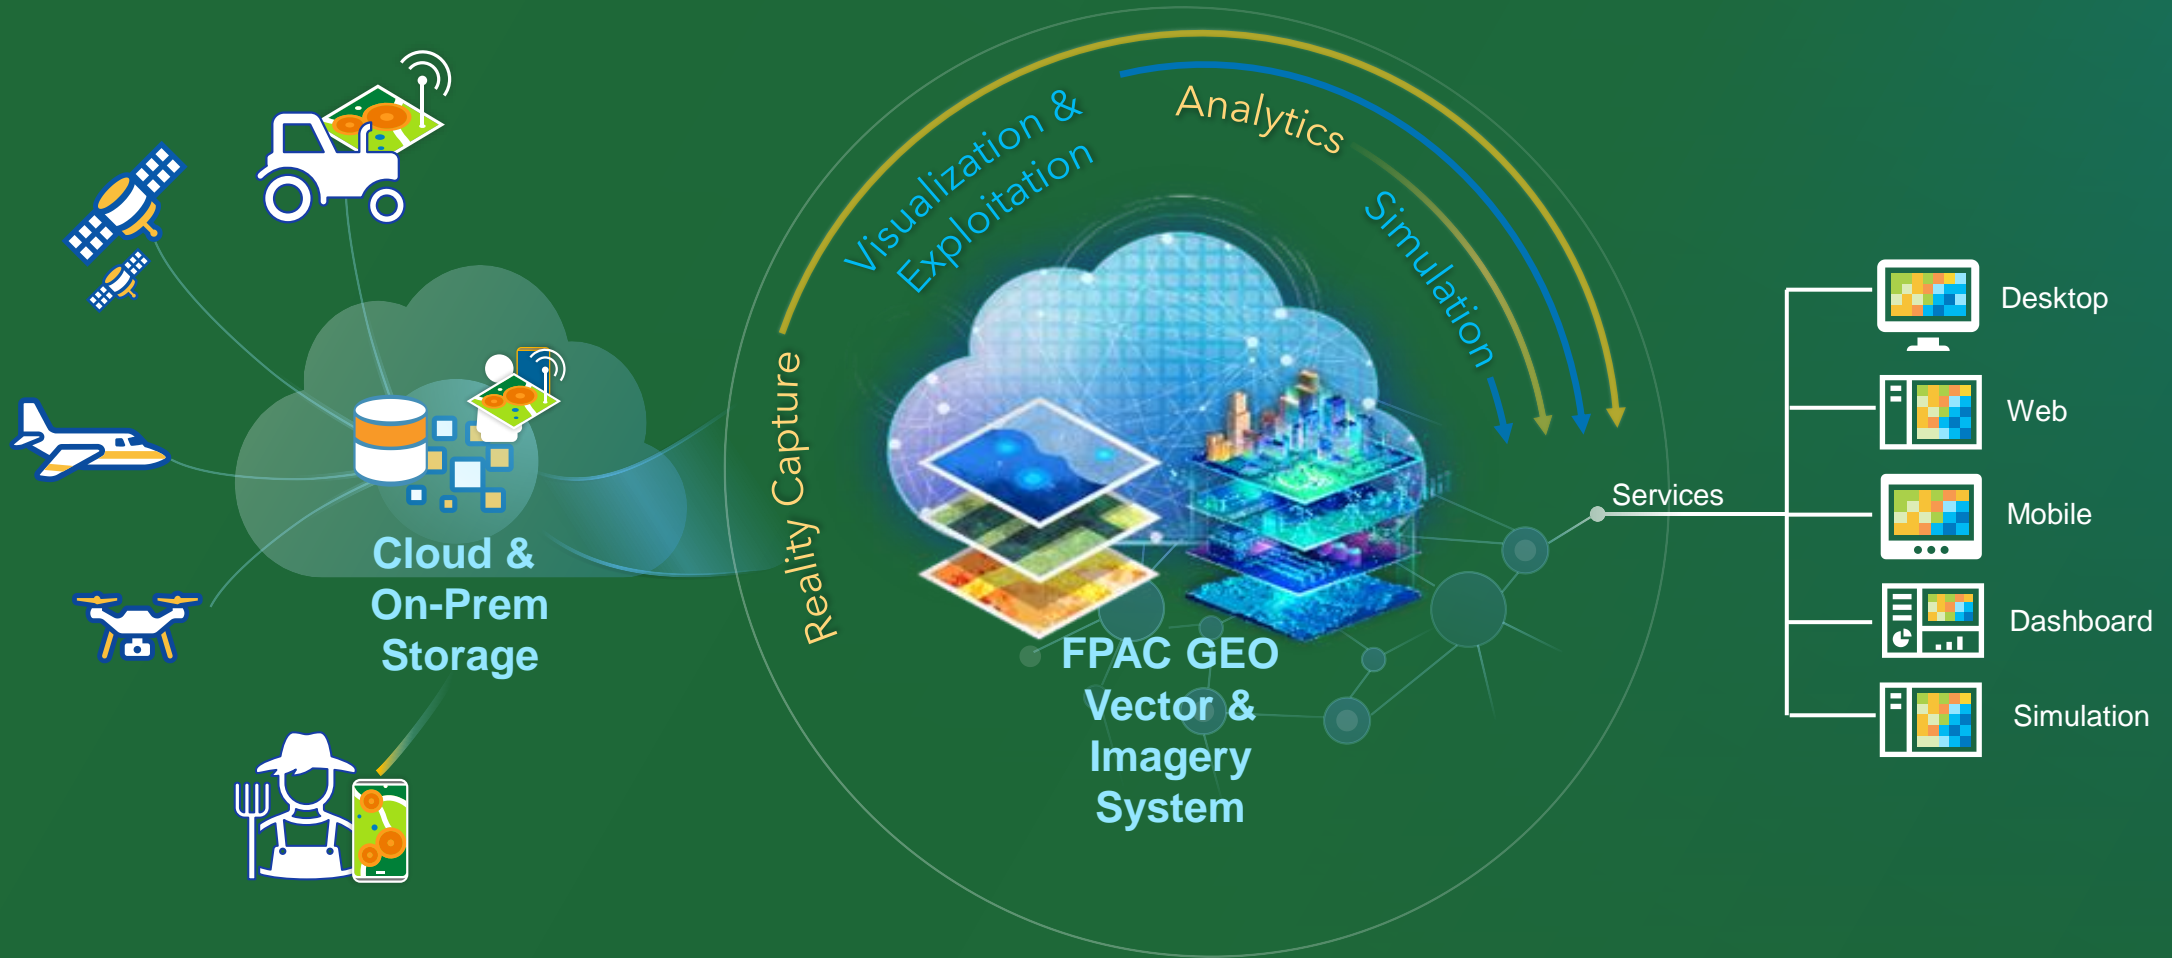

New Solution Vision for Single Full Authoritative Source

FPAC Business Center Geospatial Enterprise Operations Branch

Providing a modern imagery infrastructure for geospatial services for all of FPAC

The Farmer's ALMA-DAAC

Remote Sensing for the Farmer

Request for Support from NGAC

- Help in developing the new business model and business value messaging
- Support from the community to elevate FPAC GEO in front of key stakeholders
- Support for IT modernization to minimize technical debt
