

USGS National Land Imaging (NLI) Program -- Landsat Operations and Development Status

Landsat 9

- Launched in September 2021
- Landsat imagery publicly available since February 2022
- Full mission handover from NASA to USGS this summer

Landsat 7

- With successful Landsat 9 deployment, USGS repositioned Landsat 7 into a lower orbit in April, setting the stage for rendezvous with a NASA servicing mission in 2026

Landsat "Collection 2" Archive

- Entire 50-year Landsat archive reprocessed for improved accuracy and available in the Amazon Web Services (AWS) commercial cloud since April 2021
- Users have accessed this data over **2 billion times** in the past year (more accesses than in the entire history of Landsat)

Landsat Next

- Landsat Next planning underway between NASA and USGS
- Greatly improved spectral and spatial capability over Landsat 8/9
