

Summary Overview of National Parcel Data Summit & Federal Parcel Requirements Workshop

For
David Alexander

As developed by the:
HIFLD Executive Secretariat

27 September 2016

National Parcel Data Summit Participation

- ❖ 120+ Registered Attendees
- ❖ Representation from:
 - ❖ 22 Federal Departments/Agencies
 - ❖ 20 State/Local Governments
 - ❖ 18 Private Sector Organizations
 - ❖ 4 Trade Associations or Advisory Councils
(i.e. IAAO, MAPPs, NAPSG, NGAC)

Overarching Objectives for the Summit

- ❖ **Revisit the status and benefit of National parcel-level data.**
- ❖ **Identify possible approaches for achieving a comprehensive national parcel level dataset.**
- ❖ **Explore the appropriate role of the Federal Government.**
- ❖ **Brainstorm incentives to increase parcel data sharing.**

High-Level Themes That Emerged

- ❖ Parcel data starts with local jurisdictions.
- ❖ There remains a demonstrated need for National-level parcel data
- ❖ Federal leadership and/or coordination of requirements and resources is needed.
- ❖ Barriers appear to fall more along cultural and institutional lines – not technical.
- ❖ Still need strong data standards
- ❖ Consider leveraging/licensing private sector investments in normalizing and aggregating National parcel data

Action Items That Emerged

- ❖ National Geospatial-Intelligence Agency (NGA) is proceeding with a limited procurement for National-level parcel data to service immediate HLS/HLD requirements
- ❖ HIFLD Executive Secretariat was tasked to host a follow up requirements workshop with the broader Federal Depts./Agencies to enumerate Federal requirements
- ❖ Oregon GIO, along with other interested attendees/associations are formulating a 'position paper' to pose recommendations or suggested courses of actions they might wish the Federal Government pursue in regards to establishing a 'whole-of-the-Nation' approach to aggregating a National Parcel Data layer.

Federal Parcel Data Workshop

- ❖ Held September 20th at Homeland Security Acquisition Institute (HSAI) with 31 participants across 14 Departments/Agencies
- ❖ Examined existing Federal use cases for National Parcel Data & any current driving policy mandates
- ❖ Discussed needed attributes and touch points to other NSDI initiatives (i.e. NAD)
- ❖ Action Items:
 - ❖ Will be building a consolidated 'matrix' of requirements for both the geometry and business attributes needed by Depts./Agencies.
 - ❖ Will provide requirements matrix to the FGDC Cadastral Subcommittee and/or other FGDC Governance bodies for review and adjudication.
