## 1. NSGIC State Government Geospatial Maturity Assessment

Welcome to the NSGIC Geospatial Maturity Assessment (GMA) that was developed for state governments. It is an objective baseline assessment methodology for routinely monitoring and validating the performance of a state's geospatial business capabilities. By using the GMA, decision makers (e.g., Chief Information Officer (CIOs), Geographic Information Officer (GIOs), Governor, Legislators, etc.) will have an understanding of the extent and value of geospatial assets and capabilities in your state and how they compare to other states.

This is the first section of this survey. We are asking all states to complete this section by September 9, 2011, so that the results can be used for the Annual Conference. The questions on this page will allow users of the GMA to access important background information about your program. The following pages provide a mechanism to compare the relative development stages of each state in the areas of Governance (GIO, Planning and Council Activities), Services and Data Assets. Please complete the remaining sections no later than November 4, 2011.

Questions marked with an asterisk (\*) must be answered. In most cases the answer to these questions will cause you to skip to the appropriate follow-up questions, based on your answer.

Please make sure you E-Mail your unique survey URL to Bill Burgess at [william.burgess@comcast.net](mailto:william.burgess@comcast.net).

## 28. Last Information Page

THANK YOU for completing the Geospatial Maturity Assessment for your state. Please note the following items.

First, please make sure that you have E-Mailed your unique URL to the survey to Bill Burgess at [william.burgess@comcast.net](mailto:william.burgess@comcast.net).

You can view the responses of all states as they respond to the Assessment at the following URL that you can copy and paste into your browser. Upon completion for 2011 (November 4, 2011), we will provide a copy of the spreadsheet and database to each state for their use.
