

As Developed by the HIFLD Executive Secretariat

For the FGDC Coordination Group

12 July 2016

Overarching Objectives for this Summit

Revisit the status and benefit of national parcel-level data.

- Identify possible approaches for achieving a comprehensive national parcel level dataset.
- Explore the appropriate role of the Federal Government.
- Brainstorm incentives to increase parcel data sharing.

Summit Participation

- ❖ 120+ Registered Attendees
- * Representation from:
 - 22 Federal Departments/Agencies
 - 20 State/Local Governments
 - 18 Private Sector Organizations
 - ❖ 4 Trade Associations or Advisory Councils
 - (i.e. IAAO, MAPPS, NAPSG, NGAC)

High-Level Themes That Emerged

- Parcel data starts with local jurisdictions.
- There remains a demonstrated need for an aggregated National parcel data set.
- Federal leadership, coordination, and resource investment is needed.
- Barriers appear to fall more along cultural and institutional lines – not technical.
- Still need strong data standards
- Consider leveraging/licensing private sector investments in normalizing and aggregating National parcel data

Consolidated Feedback from Attendees

- Overall attendees felt that the summit did meet their expectations.
- Appreciated the depth and breadth of perspectives that were represented, as well as the open discussions.
- ❖ Want to see a lead 'Federal Champion(s)' emerge for this idea, as we have seen in NAD and 3DEP.
- Very much want to harness the momentum created by this forum to create real and tangible progress.

Some Action Items That Emerged

- National Geospatial-Intelligence Agency (NGA) is proceeding with a limited procurement for National –level parcel data to service immediate HLS/HLD requirements
- HIFLD Executive Secretariat has been tasked to host a follow up requirements workshop with the broader Federal Depts/Agencies to enumerate Federal requirements for parcel data
- ❖ Oregon GIO, along with other interested attendees/associations will be formulating a 'position paper' to pose recommendations or suggested courses of actions they might wish the Federal Government pursue in regards to establishing a 'whole-of-the-Nation' approach to aggregating a National Parcel Data layer.

Questions
