

# Steering Committee Meeting

## National Spatial Data Infrastructure (NSDI) Strategic Plan Update

*Ken Shaffer*

*Federal Geographic Data  
Committee*

*October 11, 2018*

# NSDI Strategic Plan

---

- ❖ Core Team developed a set of goals and objectives
  - ❖ Based on extensive input from the community that was the basis for the 2017 Strategic Framework
- ❖ Core Team will pause while the impacts from the passage of the Geospatial Data Act (GDA) are evaluated – but will continue to meet
- ❖ Then incorporate the associated GDA elements into the strategic plan and ensure alignment
- ❖ It is anticipated that most of the current content will be in the revised version since it is already based on components from A-16 that align well with the GDA

# NSDI Strategic Plan – Draft Goals

---

1. Establish and implement collaborative geospatial partnerships for high priority national issues and business needs
2. Promote the Geospatial Shared Service to enhance evidence-based policymaking and drive efficiencies
3. Enhance management of National Geospatial Data Assets (NGDA)
4. Update the national geospatial policy framework

# GDA – NSDI Strategic Plan

---

Section 753(c) Duties . The Committee shall –

- (1) Lead the development and management of and operational decision making for the National Spatial Data Infrastructure strategic plan and geospatial data policy in accordance with section 755;

Section 755. National Spatial Data Infrastructure

(b) GOALS ...

(c) STRATEGIC PLAN. – The Committee shall prepare and maintain a strategic plan for the development and implementation of the National Spatial Data Infrastructure in a manner consistent with national security, national defense, and emergency preparedness program policies regarding data accessibility.
