MEMORANDUM

To: President's Management Council

From: Anne J. Castle *Anne J. Castle* AUG 1 - 2011
Chair, Federal Geographic Data Committee
Assistant Secretary for Water and Science, U.S. Department of the Interior

Subject: Federal Geographic Data Committee -- Designation of Senior Agency Official for Geospatial Information

I am writing to you in my capacity as Chair of the Federal Geographic Data Committee (FGDC). The FGDC is an interagency committee that promotes the coordinated development, use, sharing, and dissemination of geospatial data on a national basis. The FGDC provides leadership and facilitates coordination between agencies, governments, academia, industry and professional organizations in developing geographic information and technology critical to managing the nation. The Office of Management and Budget (OMB) established the FGDC through OMB Circular A-16, "Coordination of Geographic Information and Related Spatial Data Activities." Executive Order 12906 (Clinton, 1994) assigns responsibility for the implementation of the National Spatial Data Infrastructure (NSDI) to the FGDC. These coordination activities are facilitated by the FGDC Secretariat, hosted within the U.S. Geological Survey. The work of the FGDC is particularly important in today's era of difficult budgets to ensure that geospatial data systems and efforts are well coordinated and non-duplicative.

FGDC Steering Committee Meeting

The FGDC Steering Committee held its initial 2011 meeting on Tuesday, June 7 in Washington, D.C. Information about the meeting is posted at: <http://www.fgdc.gov/participation/steering-committee/meeting-minutes/june-2011/index.html>. The next Steering Committee meeting is being planned for October 2011.

FGDC Steering Committee Membership – Response Requested

OMB Memorandum M-06-07, "Designation of a Senior Agency Official for Geospatial Information," asks agencies to designate a Senior Agency Official for Geospatial Information (SAOGI) to oversee, coordinate, and facilitate the agency's implementation of the geospatial-related requirements, policies, and activities. Generally, the SAOGI should be at the Assistant Secretary or Chief Information Officer level. The SAOGI serves as the agency's representative on the FGDC Steering Committee.

Please identify the official who will serve as Senior Agency Official for Geospatial Information and represent your organization on the FGDC Steering Committee. Please send your responses to Ivan DeLoatch, FGDC Executive Director, at ideloatch@fgdc.gov by July 15, 2011. Mr. DeLoatch can be reached at 703-648-5752.

Geospatial data and technology will play a key role in addressing a variety of Administration priorities. The Steering Committee will play a critical role in addressing several important geospatially-oriented policy issues, including Information Technology Reform, Place-based Policies, Open Government, Data.gov, the Geospatial Platform, and other shared services initiatives.

I will provide an agenda and additional information prior to the next Steering Committee meeting which will be held in early October. Please let me or Mr. DeLoatch know if you have additional issues or topics to be addressed through the FGDC Steering Committee. I look forward to working with you to advance the Administration's geospatial agenda.
